Flu Season is fast approaching! Please make it a habit to use the HAND SANITIZER STATIONS at each of the 1st floor elevator lobbies.

- Prevention Tips for Your Work Environment —
- Frequent hand-washing is an effective preventative against many kinds of bacteria, some viruses & the common cold.
 - Carry an alcohol-based hand sanitizer—use before & after touching elevator buttons, door handles, etc.
 - Routinely clean frequently-touched objects & surfaces including doorknobs, keyboards, & phones.
 - Cover your mouth & nose while coughing or sneezing.

If you've ever had the flu, you know that making the extra effort is worth it if it helps you avoid getting sick.
